

### **A Common Area that is anything but common**

Construction is progressing at a rapid pace, walls are going up and the new space is starting to take shape. Everyone is excited! One of the most significant upgrades will be the new common area. The vision for the new space was a relaxed, light-filled setting that provided an open, accommodating area to greet family and friends for lifecycle events and place where parents could comfortably socialize while waiting to pick their children up from CSR's educational programs. Rogers Partners design more than delivers on this vision. The space will make a fantastic first impression on everyone entering Community Synagogue and will surely see use beyond services and events.

As quickly as the return to our new space in September is approaching, the conclusion of the Kadima campaign is coming even sooner. We are looking for 100% participation among the congregation by mid-April. No contribution is too small, but we still have a significant goal in front of us.

Everyone will enjoy and benefit from the new space, so it would be great if everyone contributed to making it happen. Please consider pledging today and help us reach our common goal.
