

A Little bit of light pushes away a lot of darkness – Jewish Proverb

One of the design goals of the new building design was to take advantage of the buildings southeastern exposure and let in more natural light. Natural lighting through windows has a very calming and peaceful effect on our moods and emotions. With this in mind, the new entrance and façade will feature floor to ceiling windows that will allow the interior to be filled with light. Windows have also been incorporated into the sanctuary design to allow morning services to be enhanced with natural light.

Please keep in mind that the Kadima campaign will be wrapping up in mid-April, just two months from now. Our goal is 100% participation by the CSR congregation. Please consider pledging today. Just like a little light, a contribution of any size will have a very positive effect.
